# IT'S SUMMER TIME!

## 5 Summer Lawn Tips

**Tip #1:** Only water every other day at most, twice a week would be better; too much water can be as bad as too little. You don't want a flooded or muddy lawn do you?

**Tip #2:** Only water at night! The sun might burn your lawn other wise; also it's too hot this time of year to want to work outside during the day anyways.

**Tip #3:** Mow at least once a week. Healthy lawns grow a bit faster so you might need to mow more often if you want to keep it down.

**Tip #4:** Use mulch in your garden to reduce evaporation and retain moisture. Less work for you, less water used. It's a win-win situation right?

**Tip #5:** Leave the grass growing higher. The lawn will look greener and the roots will grow longer and longer, deeper roots will help the grass survive if it doesn't get water for a few days so you won't have to worry as much about the grass being brown after your vacation.
